About Me

AI Software Engineer specializing in **Agentic AI** and **Cognitive Architectures**. Experienced in building autonomous systems that utilize complex reasoning, tool use, and long-term memory. Proficient in orchestrating high-performance microservices with **Go (Golang)** and **Python**, with a focus on scalable SaaS solutions and advanced in-context learning frameworks. Leveraging agentic coding for coding, debugging and refactoring to accelerate development timeline

About Me

Skills

- **Core AI:** Agentic Systems, In-Context Learning, RAG, Memory Systems.
- **Languages:** Python, Go
- **Development:** Microservices, API Design, SaaS Architecture, Agentic Coding

Certificates

- [CS50AI](#)
- [MLOps](#) ([DataTalksClub](#))
- [Machine Learning](#) ([DataTalksClub](#))

Experience

June 2023 - PRESENT

General Magick Industries, Thailand - AI Developer

- **Architected Agentic AI Systems:** Designed and implemented autonomous AI agents capable of complex reasoning and task execution, moving beyond simple generative responses.
- **Engineered AI Memory:** Built advanced AI memory architectures to optimize in-context learning, allowing agents to retain and retrieve state across extended interactions.
- **Built Scalable Microservices:** Developed high-performance AI-empowered SaaS microservices using **Go** and **Python**

Education

December 2016 - January 2020

Yangon Technological University, Myanmar

January 2023 - June 2024

Rangsit University, Thailand - *Bachelor of Science in Information and Communication Technology*
